

 **FAMEPLA**
MORE THAN EFFICIENCY

A leading manufacturer of metal workshop furniture Famepla was established in 1998 and is based in Pieve del Grappa (TV). The production process is managed in-house, so that each phase of the cycle is controlled and the quality of our products can always be guaranteed.

Thanks to the experience gained over the years, Famepla is a company capable of satisfying the needs of a wide range of customers: from the engineering sector to the aerospace and transport sector, passing through the automotive, military, medical, manufacturing and education sectors.

All products are designed to meet the needs of a very wide range of users. Design is combined with a focus on safety to support the production process within each company, in Italy as well as the rest of the world. Cabinets with drawers or with doors, workbenches, trolleys for transporting tools, shelving with shelves and plastic container structures take shape every day at our production site and guarantee a high level of performance.

Our product range includes more than 30,000 items of which more than 400 are available in stock and with fast delivery. We are present worldwide through an extensive sales network. Our customers are served directly by our structure or through our partners or authorised dealers. This is the reason why who has chosen us over the last 20 years never walked away.

A GROUP,
AN IDEOLOGY,
SPECIFIC AREAS
OF MEMBERSHIP

We are people who regard research, innovation, sustainability and the human factor as indispensable values of any business. From kindergartens to work organisation, all the way to health plans: **i'M** is a family, a laboratory of ideas where the team determines the Group's success and outlines a strategy that favours not only the economic aspect, but also an efficient style of service that knows how to meet market demands.

Investments in training and innovation enable Anicrin to design and produce in vitro diagnostic devices and plastic medical instruments for the fields of bacteriology, clinical chemistry and pharmaceuticals, dynamically responding to the needs of scientific research.

Since 1998, Famepla has been producing metal furniture for workshops in various sectors to support the production process in every business context, both in Italy and abroad.

From Montessori educational materials to furniture for kindergartens, schools, libraries and cultural centres, GAM imagines and designs interconnected and functional learning environments to support the individual in its growth and education.

For 50 years we have been looking for ethical and sustainable solutions for the molding of plastic bins.

THE MATERIAL: RECYCLED AND RECYCLABLE

For **FAMEPLA**, environmental sustainability is a responsibility and a concrete commitment. For this reason, FAMEPLA uses 100% recyclable materials to offer a product with a lower environmental impact. From the choice of wood, to metal, to recycled plastic, FAMEPLA puts ethical and social values first, favouring a production chain designed with total respect for the environment.

METAL

————— We use top-quality steel for the metal structures, characterised by high wear resistance and long service life, to ensure the robustness and stability of our products. Components with a galvanised finish are made from steel sheets coated with hot-dip galvanising, giving them a very high resistance to corrosion.

WOOD

————— The wooden tops are made of beech veneer. The edges of the tops are sanded on all sides. The beech veneer complies with EN 635-2 and the quality assurance complies with EN 986:2000. In addition, the formaldehyde emission class meets the requirements of the EOS Chemicals Ordinance.

OUR COLOURS

The colour combinations are created directly in our factory, which allows us to satisfy high quality standards. In addition to the standard colours, the chosen product can be produced in any desired colour.

UNIBOX SERIES

The UNIBOX Tilt Bin system offers an excellent way of storing small parts in visible locations – this promotes visual stock control and negates migrating stock. Available in different models by depth and height, they all have a width of 600mm which allows them to be stacked in a variety of combinations.

- Organisation thanks to the possibility of creating customised combinations
- Easy identification with transparent drawers
- Optimal access with pivotal opening
- Stackable on trolleys, frames and vertical drawers

STORAGE BOXES

Stackable plastic containers made of high-grade polypropylene, suitable for storing small and medium-sized material. Two versions are available depending on the need for use. Both have double front walls that ensure maximum stability even when stacked.

- Solidity guaranteed by the strength of polypropylene
- Stackable to facilitate organisation and minimise space
- Easy access thanks to the front opening shape
- To combine with shelving, trolleys and cabinets

DRAWER CABINETS

Manufactured from high quality steel they are available in a wide range of size, colour and finish options to suit all various domestic, commercial and industrial environments allowing the user to create immediate and identifiable super high-density storage locations.

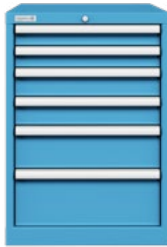

- Welded construction
- Anti tilt locking mechanism
- Non corrosive - primed and painted inside and out
- Drawer loads up to 200kg with full or partial drawer extension
- Drawer slides and guide rails are covered by a lifetime warranty
- Partitioning material creates an organised and controlled drawer layout
- Upgrade options - wheels, plinths, shelves, doors, worktops and perfo panels

WORKBENCHES

Our workbenches can be built as static stand-alone units or with the simple addition of castor sets, can also be made mobile. Manufactured from high quality steel our modular workbenches are highly durable and are supplied with various worksurfaces and accessories.

- High load capacity up to 1400kg
- Drawer load up to 100kg
- Wide choice of worktops and substructures
- Fast access time for stored parts and tools thanks to perforated back panel

STORAGE WORKBENCHES

Compact workbenches offer a versatile, modern and robust solution for production and workshop, laboratory and hardware. Drawers, doors, shelves and castors can be added to the worktop to create a fully customised workstation.

- High load capacity up to 1500kg
- Centralised lock
- Modular system fully customisable
- Fully mobile

PERFORATED BACK PANELS

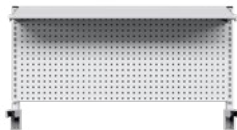

The perforated tool panel has 10x10mm square holes, with a 38mm pitch, and constitutes a fundamental element for your industrial workstation or work area. It can be installed on dual-slotted uprights fitted to workbenches and trolleys, on walls by using appropriate brackets or inside a shadow board roller shutter cabinet that can either be bench mounted or wall fixed.

- Quick access to tools thanks to hooks and shelves
- Easy assembly
- Customisable due to modular system
- Integral with our full product range

COMPUTER CABINETS

A critical part of daily working practices includes the maintenance and audit of hardware, computers and other electronic devices – especially in workspaces which create dust, swarf and air pollutants. Our wide range of PC cabinets and quality stations helps combat the daily degradation and abuse these expensive and essential items receive.

- Central locking system
- Modular system
- Built-in ventilator and dust filter
- Roller shutter cabinet

CNC TOOL STORAGE

Reduce down time, increase efficiency, space save and reduce costs with our cnc tool storage and transport solutions. Our tool holders are made of ABS, resistant to impact and mineral oils, and are available in various designs and sizes to accommodate different types of spindle. The holder is screwed to our insert frame and tool cradle or attached with a catch fastener.

- Super density CNC tool storage
- For all tools types
- Solidity guaranteed by impact-resistant materials
- Easy assembly thanks to the snap-on button
- Frames fit to trolleys, machine cabinets and CNC cupboards

CABINETS WITH DOORS

Metal cabinets with doors for workshop and office are ideal for protecting and storing away tools and documents. As an alternative to conventional hinged-door cabinets, to reduce the overall size we also offers space-saving solutions as cabinets with sliding doors and as roller shutter cabinets.

- Perfect vision due to Plexiglass doors
- Order and organisation with containers and hooks
- Customisable by adding shelves and drawers
- High capacity up to 600kg
